✅ COMPLETE EXAMPLE

🎯 Urban Geometry: Lines & Shapes in the City

Today’s challenge is all about discovering the hidden patterns and bold shapes that make city life so visually dynamic! Head out and hunt for strong lines, repeating shapes, and geometric forms—think crosswalks, building facades, staircases, and shadows.

📍 **Location:** Flinders Street Station area
⏱️ **Duration:** 45 minutes
📸 **Recommended Gear:** Fujifilm X-T5 with 23mm f/2 lens
🌤️ **Weather:** Partly cloudy (ideal for shadow play)

💡 **Shooting Tips:**
- Look for leading lines that guide the viewer’s eye through the frame
- Use a low or high angle to exaggerate shapes and create dramatic compositions
- Pay attention to light and shadow—the current weather creates perfect contrast

Creative Twist: Shoot only in black and white mode (adjust your X-T5 to monochrome) to focus purely on form and contrast.

Reflection Prompt: Which image surprised you most, and how did focusing on geometry change the way you saw your surroundings?
