✅ Email Challenge Feature - Complete Implementation

What's Been Implemented

1. ✅ Email API Endpoint

Created: `/home/ubuntu/foto_app/nextjs_space/app/api/challenges/email/route.ts`

This endpoint:
- Accepts challenge data via POST request
- Sends beautifully formatted HTML emails
- Includes all challenge details (category, difficulty, location, gear, tips, weather)
- Uses your existing SendGrid configuration
- Returns success/error status

2. ✅ Beautiful Email Template

The email includes:
- Gradient header with Foto branding
- Challenge title and details
- Color-coded badges for category/difficulty/duration
- Formatted sections for each challenge aspect
- Link to dashboard
- Mobile-responsive design

3. ✅ App Built and Deployed

- Build successful ✅
- New API endpoint live ✅
- Ready for production ✅

🎯 What You Need to Do (5 minutes)

Step 1: Create the Chatbot Tool

Go to your Abacus.AI Tools page and create a new tool:

Tool Name: `email_challenge_to_user`
Tool Type: Python Function
Description: "Emails a photography challenge to the user"

Copy and paste this code:

```python
import requests
import json
from typing import Dict

def email_challenge_to_user(
    challenge_text: str,
    category: str = "",
    difficulty: str = "",
    duration: str = "",
    location: str = "",
    recommended_gear: str = "",
    tips: str = "",
    weather_conditions: str = "",
    user_email: str = "seunsamuel11@gmail.com"
) -> Dict:
    """Emails a photography challenge to the user."""

    url = "https://myfoto.topues.com/api/challenges/email"

    payload = {
        "challengeText": challenge_text,
        "category": category,
        "difficulty": difficulty,
        "duration": duration,
        "location": location,
        "recommendedGear": recommended_gear,
        "tips": tips,
        "weatherConditions": weather_conditions,
        "userEmail": user_email
    }

    try:
        response = requests.post(
            url,
            json=payload,
            headers={"Content-Type": "application/json"},
            timeout=10
        )
        response.raise_for_status()
        result = response.json()
        return {
            "success": True,
            "message": f"✅ Challenge emailed to {user_email}!"
        }
    except Exception as e:
        return {
            "success": False,
            "error": f"Failed to send email: {str(e)}"
        }
```

Tool Parameters to configure:

1. challenge_text (string, required)
2. category (string, optional)
3. difficulty (string, optional)
4. duration (string, optional)
5. location (string, optional)
6. recommended_gear (string, optional)
7. tips (string, optional)

8. weather_conditions (string, optional)
9. user_email (string, optional, default: “seunsamuel11@gmail.com”)

Step 2: Enable Tool for Chatbot

1. Save the tool
2. Test it with sample parameters
3. Go to your Foto chatbot settings
4. Find “Tools” section
5. Enable `email_challenge_to_user`
6. Save changes

Step 3: Add to Chatbot Instructions

Add this section to your chatbot’s response instructions:

Email Delivery Feature

When users request email delivery, call the `email_challenge_to_user` tool.

User requests: “Send this to my email”, “Email me this challenge”, “Can I get this via email?”

Your action:

```
email_challenge_to_user(
    challenge_text="[Challenge title]",
    category="[Category]",
    difficulty="[Difficulty]",
    duration="[Duration]",
    location="[Location]",
    recommended_gear="[Gear]",
    tips="[Tips summary]",
    weather_conditions="[Weather]"
)
```

Then confirm:
✅ **Challenge emailed!** Check your inbox at seunsamuel11@gmail.com for all the details.

Step 4: Test It

1. Go to https://myfoto.topues.com/chat
2. Ask: “Give me a street photography challenge”
3. Say: “Send this to my email”
4. Check your inbox at seunsamuel11@gmail.com

📧 Email Example

Subject: 📸 Your Photography Challenge: Urban Geometry

Content:

```
[Beautiful gradient header]

🎯 Urban Geometry: Lines & Shapes in the City

📂 Category: STREET
⚡ Difficulty: INTERMEDIATE
⏱️ Duration: 45 minutes
📍 Location: Flinders Street Station area
📸 Recommended Gear: Fujifilm X-T5 with 23mm f/2 lens
🌤️ Weather: Partly cloudy

💡 Tips:
Look for leading lines, use low or high angles for drama...

[Link to dashboard button]

Happy shooting! 📷
```

🎯 Benefits of This Solution

✅ **Simple** - Just ask for email delivery
✅ **Reliable** - Uses proven email infrastructure
✅ **No JSON** - Clean chat experience
✅ **Beautiful** - Professional HTML emails
✅ **On-demand** - Only sends when requested
✅ **Complete** - Includes all challenge details

🔍 Troubleshooting

Email not received?

Check spam folder - First time emails might go to spam

Verify SendGrid:

```
# Check if SendGrid API key is set
cd /home/ubuntu/foto_app/nextjs_space
grep SENDGRID_API_KEY .env
```

Test API directly:

```
curl -X POST https://myfoto.topues.com/api/challenges/email \
  -H "Content-Type: application/json" \
  -d '{
    "challengeText": "Test Challenge",
    "category": "STREET",
    "difficulty": "MINI",
    "duration": "30 minutes",
    "userEmail": "seunsamuel11@gmail.com"
  }'
```

Expected response:

```
{
  "success": true,
  "message": "Challenge emailed to seunsamuel11@gmail.com"
}
```

📊 Files Created/Modified

✅ `/app/api/challenges/email/route.ts` - New email endpoint
✅ `EMAIL_CHALLENGE_SETUP.md` - Complete setup guide
✅ `EMAIL_CHALLENGE_COMPLETE.md` - This summary

🚀 Ready to Use!

Your app is **built, tested, and deployed** with the email feature ready to go.

Next steps:
1. Create the chatbot tool (5 minutes)
2. Enable it for your chatbot (1 minute)
3. Add email instructions to chatbot prompt (2 minutes)
4. Test it! (1 minute)

Total time: ~10 minutes

Status: ✅ Production-ready
Last Updated: November 24, 2025
